

## CURRICULUM OVERVIEW 2018-2019

### YEAR 5 ~ SPRING 2nd HALF TERM

#### *Come and See*

In Come and See we will be looking at the Eucharist as a memorial sacrifice in the Jewish sense of remembering, that is it makes present a past reality. It is a memorial of Christ's sacrifice on the Cross, through which Christ gives his body and blood for the salvation of all people and provides hope for the future.

After that we will begin our Topic on Lent. Lent is the season when Christians try to focus on giving. This helps us to identify with the complete sacrifice of Jesus which is remembered in the liturgy of Holy Week, especially the Easter Triduum (Holy Thursday, Good Friday and Holy Saturday – Easter Sunday.)

#### *English*

This term we will be looking at our book "Cosmic" by Frank Cottrell-Boyce. Using this wonderful story we will write about feelings and perspectives, describe some of the amazing places featured in the book, and write a cliff-hanger story.

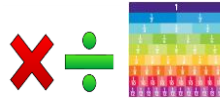

In our Reading lessons, we will be using Cosmic to infer how different characters are thinking and feeling at different points and how they change over time. We will also be predicting what might happen and why we think it.

In Spelling, Punctuation and Grammar, we will be looking at some more advanced punctuation such as colons as well as recapping our work on parentheses, apostrophes, and speech punctuation. We will be continuing our work on word families and suffixes that change meaning such as -ify, -ate and -ise to make verbs.

## Mathematics

In Singapore Maths, we will be looking at fractions. We will focus on developing our ability to handle more diverse problems involving fractions, including dividing and multiplying fractions by whole numbers. We will show improper fractions and mixed numbers using pictures and find equivalent fractions by comparing and ordering. We will then look at adding and subtracting fractions, with similar denominators. Towards the end of the term, we will multiply mixed numbers and improper fractions by whole numbers.

## Computing

In this half term, we will be exploring the earth and space using technology. The appitivity is designed so children look at all the different aspects of space.

## Learning Challenge

### Science

Our topic focus this year will be on Space. We will be looking at how the Earth and its neighbours move through space and how we see (and count) this on Earth. We will also be learning about forces like gravity and how it keeps the solar system together. As well as the planets, we will be looking at famous astronauts and finding out about their lives and missions.

## *Creative Arts*

To coincide with our Space topic, we will be creating galaxy pictures using online tools. We will then further edit our work in image editing software to make our pictures as stunning as possible. We will continue to work on rhythm and singing using Charanga.

## *PSHE*

In our PSHE week, we will be looking equality and diversity. We will be looking at how different people have different qualities in friendships and how a diverse society helps us experience other cultures.

## *P.E*

We will be continuing swimming. We will also be looking at some outdoor and adventurous activities using our school grounds.

## *French*

Children will be practising simple conversations about about clothes. They will asking and answering questions about what characters are wearing.
