

YEAR 4 ~ AUTUMN 1ST HALF TERM – 2020/2021

Key Concept Words
Belonging, Resilience, Transformation

Come and See

In the topic of 'People' the children will study all about the Family. The Church names the family 'The Domestic Church' where children may begin to understand the Church, which is 'nothing other than the family of God.' This topic explores the truth that Jesus had a natural family with real people with names and a history.

In the topic of 'Called' the children will study through Baptism and Confirmation people are given the gift of the Holy Spirit and are called to respond in their lives.

English

During this half term the children will be reading 'Cliff – Hanger' by Jacqueline Wilson. To complement our topic work we will also read non-fiction books about the Romans.

These books will form the main focus and motivation for their writing composition, grammar, reading and speaking and listening. Specifically, the children will be writing letters, diaries and developing character and setting descriptions. They will also write formal explanations and explore performance poetry.

Their focus for grammar will be based on mastering clear sentence structure, by identifying subject, verbs, and connectives. Spelling patterns include the prefixes 'mis', 'un', 'in', 'dis' and 'auto' and words ending in 'sure'.

The children will continue their guided reading sessions, where they will listen to and read a wide range of texts, allowing them to improve their fluency and expression, retrieve and record information and also make inferences and justify predictions. Throughout their English lessons the children will develop their speaking and listening skills by articulating and justifying their opinions, speak audibly in Standard English, and gain, maintain and monitor the interest of listeners.

Mathematics

In their Singapore maths lessons, pupils will learn to count in multiples of 25, 100 and 1000 in order to count larger numbers comprehensively. Pupils will learn about place value to 4 digits and they will link numbers in numerals and in words. They will compare numbers using language such as 'greater', 'smaller', 'less' and 'more', using the mathematical symbols $<$, $>$ and $=$. They will also learn about rounding numbers to the nearest 1000, 100 and 10; children will apply this knowledge to approximate, total and find the difference. Pupils will also be taught to add and subtract with numbers up to 10 000, using the column method. They will also learn mental methods for addition and subtraction. Pupils will be encouraged to think about when is the most appropriate time to use each method. They will use the methods taught to solve word problems: visualising the problems using the bar model.

Computing

In computing, the children will describe how internet search engines find and store data. They will use search engines effectively, securely and safely to build power-points/blogs, detailing what they have learnt from research that they will conduct on The Romans. Children will learn about different technologies both old and new, about inventors and the different components of a computer.

Science

In Science, the children will be looking at what happens to the food we eat. They will take an 'interactive' peep inside the human body to describe the simple functions of the digestive system in humans. They will explore and identify the different types of teeth in humans and their functions. They will also develop their understanding of interpreting food chains and identifying producers, predators and prey.

Geography

In the topic, 'What is important about Chester and how is it linked to the Romans?' the children will use atlases, maps and digital mapping to locate Chester and other Roman settlements. They will consider the River Dee and Chester's location and proximity to Wales as an ideal base for the Romans. They will also look at why tourists visit Chester – the cathedral, outdoor theatre, zoo and Elizabethan shops.

Creative Arts

During this half-term, DT will be related to the topic of the Romans. This will involve looking at Roman food and cooking, where they will make a healthy Roman meal.

In music lessons, they will appreciate and understand a wide range of high-quality live and recorded music from different traditions and from great musicians and composers. They will also follow Charanga music, performing Abba songs.

PSHE

During **Staying Safe** week, we will explore a variety of ways the children can be safe both at school and at home. **World Mental Health Day** gives us the opportunity to recognise that we may experience conflicting emotions and how to overcome these.

P.E

During Yoga sessions the children will develop flexibility, strength, technique, control and balance. They will also learn to use relaxation, breathing and visualisation techniques in meditation exercises at the end of a session.

In games lessons the children will be given the opportunity to play rugby and apply basic principles of ball control and safe use of equipment.

French

The children will be talking about other people, asking questions such as 'have you ...? I have....', and naming classroom objects. They will also learn numbers, colours and begin to explore masculine and feminine nouns.
